DETAILED ACTION

Election/Restrictions

1. Pursuant to the requirement for election of species, applicants have elected to compound of example 6, a compound of formula (I) where the precursor drug is flurbiprofen and the precursor of B is ferulic acid. Claims 1-10 are readable thereon.

Improper Markush Rejection

2. Claims 1-10 are rejected as being improper Markush claims in the definition of the B-C linker. So substituted, the resulting total compounds lack a common core and are structurally diverse and patentable distinct one from the others. A reference anticipating one under 35 USC 102 would not be a reference against the others under 35 USC 103. Limitation of the claims to B-C linkers limited to those containing a -C(O)O- or -C(O)S- group, encompassing the elected species, will overcome this rejection.

Claim Rejections - 35 USC § 112

3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. (1) A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired.

Art Unit: 1624

In the present instance, claim 1 recites the term "preferably" in the various definitions, and includes definitions of varying scope, for example, B and B₁, C and C₁ and Y₁, Y₂ and Y₃. (2) No antecedent basis is seen in claim 1 for the Y₃ variable in dependent claim 3. Thus claim 3 is an improper dependent claim. (3) Claim 8 is a substantial duplicate of claim 1 upon which it is dependent since no patentable significance is normally given to statements of intended use. (4) Claim 9 provides for the use of the compounds of claim 1, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.
